bitAIM – AI-Powered Carrom Pool Assistant

bitAIM is one of the most popular AI-powered aiming assistants designed for **Carrom Pool**. By analyzing the game board in real time using artificial intelligence and image recognition, bitAIM helps players predict accurate shot angles and trajectories. It is more than just an aiming guide—it functions as a training companion that helps beginners learn the game faster and experienced players refine their precision skills.

When you launch the app alongside Carrom Pool, bitAIM overlays predictive lines on your screen, showing exactly how the striker and coins will move. This makes it easier to practice trick shots, plan rebounds, and learn advanced indirect strategies. The app is especially useful for players who want to improve their competitive performance through consistent practice. However, developers recommend avoiding its use in ranked matches to prevent the risk of account bans.

Key Features

Trajectory Visualization: Displays accurate laser-like guides for the striker and target coins. **Supports Advanced Shots:** Master indirect shots, rebounds, and cushion techniques with ease. **AI-Powered Learning:** Uses deep learning algorithms to continuously improve accuracy predictions. **Lightweight & Fast:** Optimized to work smoothly on most modern Android devices. **Training Focused:** Ideal for practice sessions to build long-term skill and consistency.

Versions & Availability

Version	Details
bitAIM (Official)	Latest Version v84, ~21 MB, Android 7.0+, developed by App BuilderX co.
bitAIM+	Enhanced variant with extended features (requires LuluBox integration).
Modded APKs	Unofficial releases with unlocked features; may pose risks to safety.
Alternatives	Apps like 'Bitaim For Carrom Aim Pool' and 'Bitaim Indirect Carrom Pool'.

Summary

bitAIM stands out as a powerful AI-assisted training tool for Carrom Pool players of all skill levels. Its real-time shot prediction, trajectory visualization, and advanced shot support make it an invaluable guide for learning and mastering the game. The latest version v84 continues to deliver a smooth and accurate experience. While unofficial or modded versions exist, the safest option remains the official release from App BuilderX co. Use it wisely as a practice aid, and you'll quickly notice improvements in your aim, confidence, and overall gameplay.
